

The Intersection of Assessment and Campus Culture

> Where People, Processes, and Priorities Connect

Amelia Parnell, Ph.D. NECHE Annual Meeting December 11, 2019

Agenda

- About Amelia and NASPA
- Indicators of the Current Condition and Culture of Analytics Work
- Three Examples of the Intersection of Assessment and Campus Culture
- Future Predictions
- Quick Reminders and Additional Resources
- Questions

About Amelia

- Connector (of people and ideas)
- Philadelphia Eagles fan
- Taking an online course to learn about mobile app development
- Favorite research topics are data and leadership
- Recently discussed the cost of college with a group of high school seniors

NASPA addresses **common functional areas within student affairs** (housing, advising, conduct, assessment) as well as **broad higher education themes** (access, persistence, and degree completion).

Our work provides highquality professional development, advocacy, and research for **16,000 members** in all 50 states, 25 countries, and 8 U.S. territories.

About NASPA

NASPA is the leading association for the advancement, health, and sustainability of the student affairs profession.

Student Success Is Everywhere at Our Institutions!

Critical Areas That Impact Students' Success

COST OF ATTENDANCE

Basic Needs

Unexpected Opportunities or Challenges ACADEMIC PROGRESS Major Selection

Integration of Classroom and Co-Curricular Learning Experiences

SOCIAL INTEGRATION

Sense of Belonging

Healthy Behaviors

Acquisition of Job-Ready Competencies, Skills, and Abilities

Current Trends in Assessment

Embracing a **culture** of managing risk and taking chances

Leveraging the **appropriate mix of** homegrown and vendor **tools**

Balancing the **use** of quantitative and qualitative information

Identifying scalable interventions

Determining when data indicate a **time** to change plans

Current Tensions in Analytics-Related Work

More campus offices have an analytics function

Graduate programs are emphasizing the value of analytics-related skillsets

Institutions are using data with the **goal of improving student outcomes**

> Professionals across reporting lines are collaborating

Students are requesting access to their information

Current Bright Spots in Analytics-Related Work

Indicators of the Current Condition and Culture of Assessment Work

- Demand for individuals with certain skillsets is outpacing supply
- 2. Increased consumption of assessment, analytics, data, and information for business purposes
- **3. More** requests for accountability
- 4. New markets for technology-related vendors and services

Four Indicators of the Current Condition of Assessment Work

Audience Poll: Do you think the analytics culture on your campus is widespread?

"The development of an **analytics** culture that is widespread and positive is one of the most important steps that can be taken to harness the analytics revolution."

Gagliardi and Turk, 2017.

- 1. "My colleague does most of our assessment work."
- 2. "I am **flooded with requests**, most of which are in a short timeframe."
- 3. "I have a good relationship with my IR director and that's good because **data is power**."
- 4. "We need a stronger understanding of **how outsourced models** work."

Four Quotes that Describe the Current Culture of Assessment Work Themes from the 2018 NASPA Assessment Town Hall

FLEXIBILITY: Variety of Requests

MANAGEMENT: Structured Workflow

STRATEGY:

Necessary vs. Interesting Analyses

Comments from the 2018 NASPA Assessment Town Hall

"I've been asked what the **secret sauce** is for students to stay in college?"

"I'm gathering assessment results that can help us prepare for **accreditation** visits." "We need consistent language about what assessment is and that it's not a bad thing."

Students Under Surveillance?

Data-tracking enters a provocative new phase

By Lee Gardner | OCTOBER 13, 2019 ✓ PREMIUM

Max Whittaker for The Chronicle

"The more intimate student tracking becomes, the **more questions** about privacy, consent, and the use and fate of student data **will arise**."

"It isn't hard to imagine the **wealth of observational data** such location tracking might produce, and the student-success insights that might arise from it."

"For example, knowing that A students spend a certain number of hours in the library every week — and eventually communicating that to students **might motivate them to study there more often**."

Leveraging The Predictive-To-Prescriptive Analytics Paradigm Shift In Higher Education

Jim Milton Forbes Councils Forbes Technology Council CommunityVoice ①

POST WRITTEN BY

Jim Milton

Jim Milton is the CEO of Campus Management, a global leader in Higher Ed technology.

"With continued advancements in **artificial intelligence** (AI), predictive analytics has evolved systems from simply gathered and collected data into true systems of intelligence."

"With increased economic and demographic pressures, though, institutions are now seeking to move beyond descriptive and predictive analytics to alter outcomes through **prescriptive analytics**."

"By coupling real-time student engagements and interactions with behavioral data, institutions can pinpoint the motivations of individual students and **personalize recommendations to ensure positive student outcomes**."

in

Effective data strategies must address the intersection of **people**, **processes**, and **priorities**.

Parnell, 17 months ago.

The Intersection of Assessment and Campus Culture: Three Examples of Connections between People, Processes, and Priorities

Example 1: Cross-Functional Collaboration – Institutions' Use of Data and Analytics for Student Success

National Landscape Analysis

- Partnership with the Association of Institutional Research (AIR) and EDUCAUSE
- Focused on four core areas:
 - Types of student success data projects
 - Structures in place
 - Level of coordination
 - Programs, interventions and outcomes

INSTITUTIONS' USE OF DATA AND ANALYTICS FOR STUDENT SUCCESS

Results from a National Landscape Analysis

Amelia Pameli, Darlena Jones, Alexis Wesatu, and D. Christopher Brooks

Methodology

- Surveyed members of AIR, EDUCAUSE, and NASPA
- Data collected from October to December 2017
- 970 responses (894 distinct institutions)

	Frequency	Percentage
AIR	627	65%
NASPA	256	26%
EDUCAUSE	87	9%
Public,4-year	317	33%
Private non-profit, 4- year	388	40%
Public, 2-year	222	23%
Other	43	4%

Most Institutions Have Data Goals Related to Improving Student Outcomes

Source: 2017 NASPA/AIR/EDUCAUSE National Survey

Cross-Functional Collaboration Is Happening!

- 60% of institutional researchers reported involvement in assessing the impact of interventions
- **59%** of student affairs professionals reported involvement in developing the institution-wide data strategy
- 30% of information technology professionals reported involvement in managing the early-alert system

Studies Are More Often Used to Make Decisions Than to Influence Students

Source: 2017 NASPA/AIR/EDUCAUSE National Survey (N=506)

Institutions Are Using Lots of Interventions; Student Affairs Primarily Responsible

We Need Leadership (and Help) At All Levels

39%

 Of students reported feeling so depressed that it was difficult to function during the past 12 months

 Of public institutions reported providing some type of aid to address food insecurity

Must-Have Report

The Promise and Peril of Predictive Analytics in Higher Education

- Features:
 - Campus examples
 - Discussions of data privacy
 - Common challenges with using predictive models
 - Types of interventions informed by predictive models
 - Themes of communication throughout the report

Quick Reminder: Assess Students' Ability to Afford the Full Cost of College

of institutions conduct studies related to students' career pathways and postgraduation outcomes **every year**

of institutions **do not** conduct studies of students' ability to afford higher education

Table 3: To what degree have campus IR studies positively impacted the following results in recent years?

Answer	High or Very	Low or Very
	High (%)	Low (%)
Reducing tuition	6%	78%
Reducing student cost of attendance	6%	76%
Reducing campus administrative costs	14%	60%
Improving student success	53%	14%
Improving faculty productivity	21%	43%
Increasing research funding opportunities	15%	61%
Improving senior level campus decision making	68%	9%
Achieving return on investment for state financial	16%	57%
support		
Improving student learning outcomes	44%	24%
Achieving equity of student outcomes across	29%	39%
groups		
Improving graduation rates	52%	16%
Achieving high employment rates for graduates	11%	64%
Improving college access	22%	44%
NASH IR Survey Project		

Source: (2015) National Association of System Heads - <u>nashonline.org/wp-content/uploads/2017/08/Assessing-and-Improving-the-IR-Function-in-Public-University-Systems.pdf</u> N=157 (campus IR offices)

We Should Also Do More to Share Our Expertise with Colleagues

Only **40%** of higher education professionals said they **could effectively use results** of analytic studies Of the top 10 components in institutions' datainformed strategies, training ranked lowest

"What is the **best way to prepare for an analytics-related job**? What kinds of skills should I acquire now?"

Florida International University Student, October 2019.

FORTUNE TECH · HUMAN INTELLIGENCE Now Hiring: People Who Can Translate Data Into Stories and Actions

By Anne Fisher October 12, 2019

"There's no doubt that **people who** are adept at interpreting data for practical use in the real world are a hot commodity.

By 2026, the McKinsey Global Institute predicts that **there could be a demand for 2 million to 4 million translators** in the U.S. alone." "Business decisions often have to be made based on incomplete information, using intuition and creativity, and without much time. So the **ideal translator is equally adept at both left- and rightbrain thinking**." "People with the trifecta of talents are so scarce—so not just unicorns but pink unicorns with purple polka dots—that **many companies** have given up trying to hire translators from outside and **are training** them **in-house** instead."

Quick Reminder: Assess Needs and Processes, Not Just Outcomes
A Thorough Assessment Should Address 3 Core Areas

Needs	Processes	Outcomes
 gaps between current and desired programs, resources, or services 	 how programs, resources, policies, or services are delivered for the purpose of improving efficiency or effectiveness 	 results of a program, resource, policy, or service

A Practical Example: Amelia's Plant Verde

A plant that grows with healthy leaves is the result of successful watering and pruning (process) and timely and appropriate attention to potting and soil (needs).

Similarly, a successful program outcome is the result of adequate assessment of student needs and the processes by which they will be served.

Example 2: Strategic Communication – Comprehensive Learner Records and Northeastern University's SAIL Initiative

COMPREHENSIVE LEARNER RECORD

Partnership between the American Association of Collegiate Registrars and Admissions Officers (AACRAO), NASPA, and the National Institute for Learning Outcomes Assessment (NILOA)

Phase 1 (2015-2017) – 12 institutions **Phase 2 (2018-present) – 100+ institutions**

Website

Example 3: Understanding Students' Needs – Student Employment on Campus **Audience Poll:** Does your institution offer oncampus work opportunities to students?

NASPA's National Landscape Analysis

Goals of the Research

- Identify core components of robust on-campus, undergraduate student employment programs
- Examine the distinctions in student employment types by institution sector, size, and student populations served
- Highlight **effective practices** across the higher education landscape

Method

- Interviews with campus leaders and practitioners
- Campus site visits
- A national survey (n=244 institutions)

NASPA.
 Student Affairs Administrate
in Higher Education

OMARI BURNSIDE ALEXA WESLEY ALEXIS WESAW, AND AMELIA PARNELI

Our Definition of Student Employees for the Research

IN SCOPE

- Enrolled at least half-time in an undergraduate program at the institution
- Employed by the institution
- Employed on a part-time basis
- Receive hourly wages
- Supervised by institution staff
- Federal work study or institutionfunded positions located oncampus

× Graduate students

- Employees of third-party/private vendors
- Full-time employees at the institution enrolled in classes
- Positions that receive a stipend, tuition remission, academic credit or other non-monetary compensation (i.e. housing)
- Federal work study or institutionfunded positions located offcampus

Components of an Ideal Student Experience

- Clearly set goals and expectations for both students and employers
- Supervisor provides mentorship to student and supports their development
- Opportunities for student articulation of learning and reflection on employment experience
- Planned and authentic programming that facilitates application of classroom learning, exploration of professional skills, and development of career-competencies
- Acknowledgment and documentation of student growth and contributions during and after the experience

Growth & Professional Development Opportunities

Student Learning Outcomes

Assessment & Evaluation

On-Campus Employment Is an Experiential Learning Opportunity!

Survey Question: What are the goals of your institution's student employment program?

Resource: On-Campus Student Employment Self-Assessment Rubric

Leadership

ProceduresGrowth and
Professional
Development
OpportunitiesStudent Learning
OutcomesAssessment and
EvaluationProgram
Management

- ✓ Practices described in ratings are based on the landscape analysis and conversations with practitioners
- Can be taken at the department or institutionwide
- ✓ Uses a 4-point rating scale
- Intended to spark discussion among campus stakeholders and serve as a planning tool
- ✓ Provides suggestions of "ideal state"

Rubric Example: Student Learning Outcomes		
Learning Framework	To what extent does the institution identify institution-wide student learning outcomes of employment opportunities?	
Reflection (Learning)	How can student employees evaluate and document what they are learning from their employment experience?	
Feedback (Performance)	In what ways are students able to receive and give feedback on their performance during their employment experience?	

Rubric Example: Assessment and Evaluation		
Student Success Data (Collection)	How does the institution identify, collect, and store data to further understand the impact of student employment?	
Student Success Data (Analysis and Interpretation)	To what extent can the institution understand the impact of student employment on success measures?

COLLEGE

Where Do We Go from Here?

The Intersection of Assessment and Campus Culture in 5 Years: Amelia's Predictions

- Everyone will be a data person.
- Professionals will assess needs and processes, not just outcomes.
- Data will inform a more strategic and ethical use of communications.
- Artificial intelligence will not replace human contributions.
- Students will rely on collaborative, integrated campus functions to help them make decisions, learn in every environment, and prepare for life after college.

NASPA POLICY AND PRACTICE SERIES

A Framework for Divisionwide Assessments of Student Learning and Institutional Effectiveness

Andrew Morse and Kristin Woods

OVERVIEW

 \diamond

Evidence of student learning and resource stewardship are integral components to higher education's internal planning and external accountability fabric. Assessment offers educational leaders a powerful tool to address needs for detailed evidence that demonstrates areas of strength while pointing to areas that can enhance the educational environment delivered to students. Although a litary of resources exist to guide program- and department-level assessment, few resources are designed to help leaders in student affairs organize an integrated and cohesive approach to showcase the contributions of student affairs for planning and accountability. The purpose of this issue of *Policy and Practice* is to support the efforts of student affairs deducators who want to build divisionwide assessment structures that are sustainable, enable practitioners to guide and document change: and support the division's ability to showcase the contributions of the cocurriculum toward resource stewardship, student learning, and university mission.
